DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-28** are allowed.

The following is an examiner's statement of reasons for allowance:

With regard to claims 1, 16 and 21: These claims are allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious a device for generating amplified spontaneous emission (ASE) across a selected wavelength range having a waveguide comprising a plurality of separate wavelength gain subsections arranged in a serial configuration between the ends of the waveguide to collectively form an active waveguide wherein each subsection is configured to produce ASE across a wavelength range that is less than, but within the overall selected range to produce collectively ASE across the entire range, in combination with the rest of the claimed limitations.

With regard to claims 2-15, 17-20 and 22-28: These claims are allowable over the prior art of record because they depend from allowable claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takahashi et al (US 2002/0179929 A1) teaches a bent ASE device with the gain subsections being parallel active lasers of the semiconductor device.
